Akumo.
IOT Solutions

Smart Locks
Keyless room access and enhanced security

PMS integration
from booking engines and POS systems to smart room controls and guest apps

Energy saving pack
Reduce consumption, get maintenance alerts and lower operational costs

Your **smart hotel 2,0**

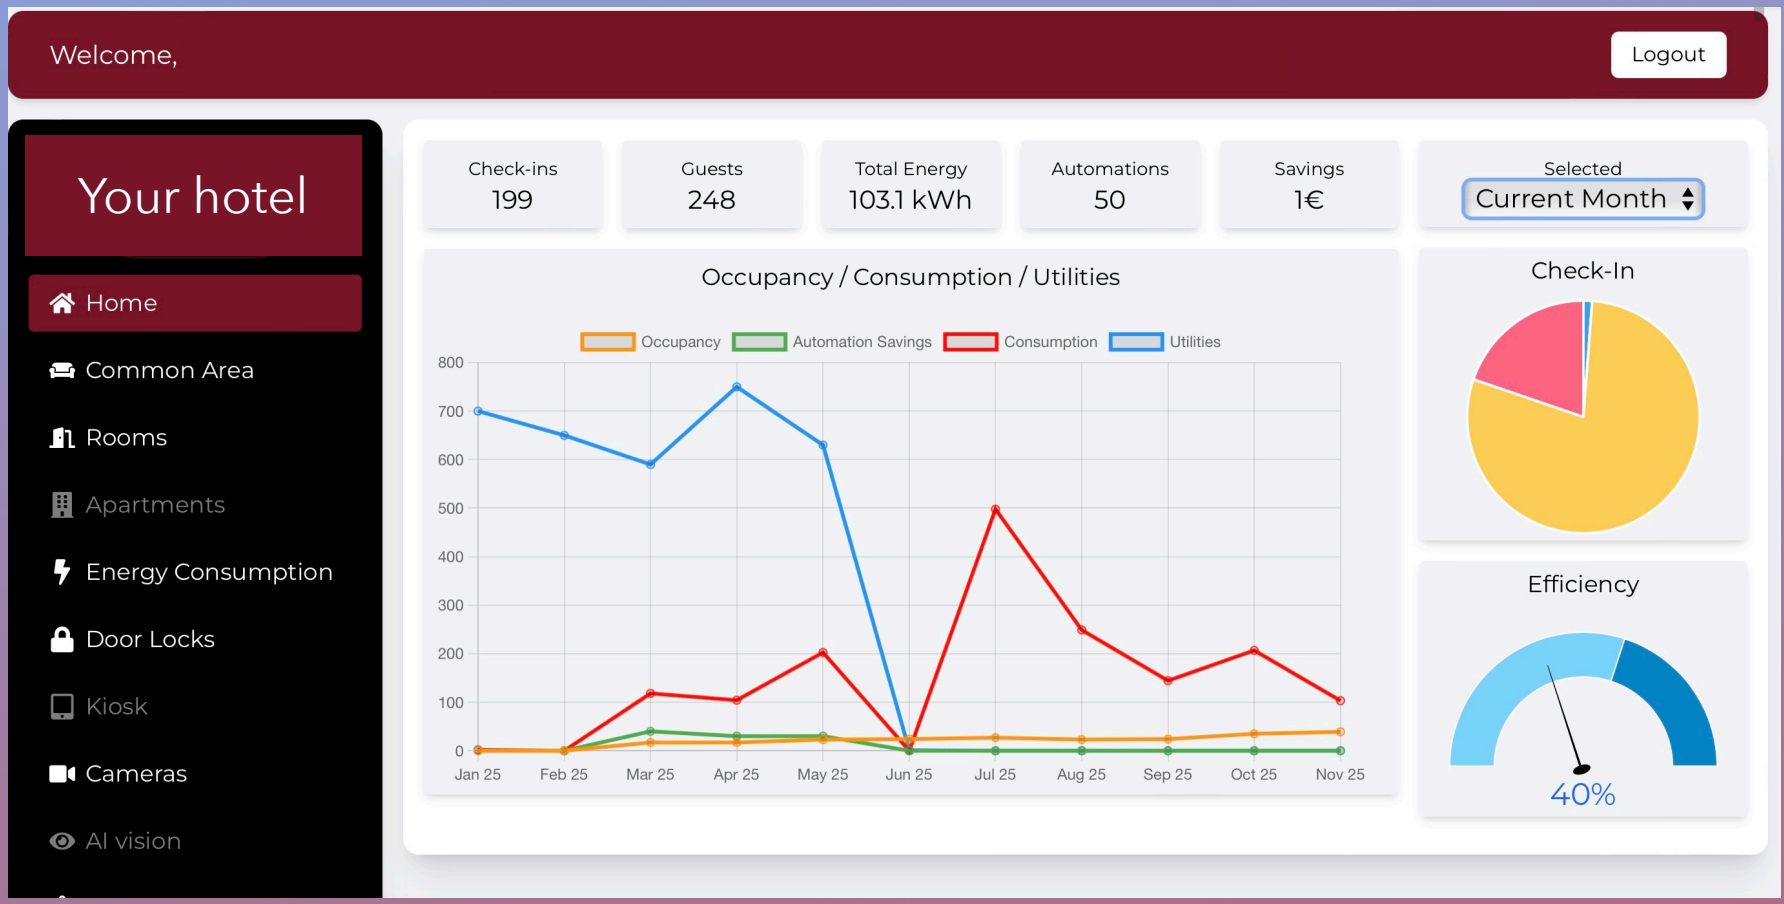
Self check-in

- Check-in via an app or a kiosk.
- Ideal for reception-less properties and less front-desk congestion at hotels
- Offer room upgrade options and other up-selling options for extra revenue

Keyless room access

- Digital key can be added to the wallet
- Enhanced guest satisfaction
- Manage access control in your custom dashboard and offer higher security

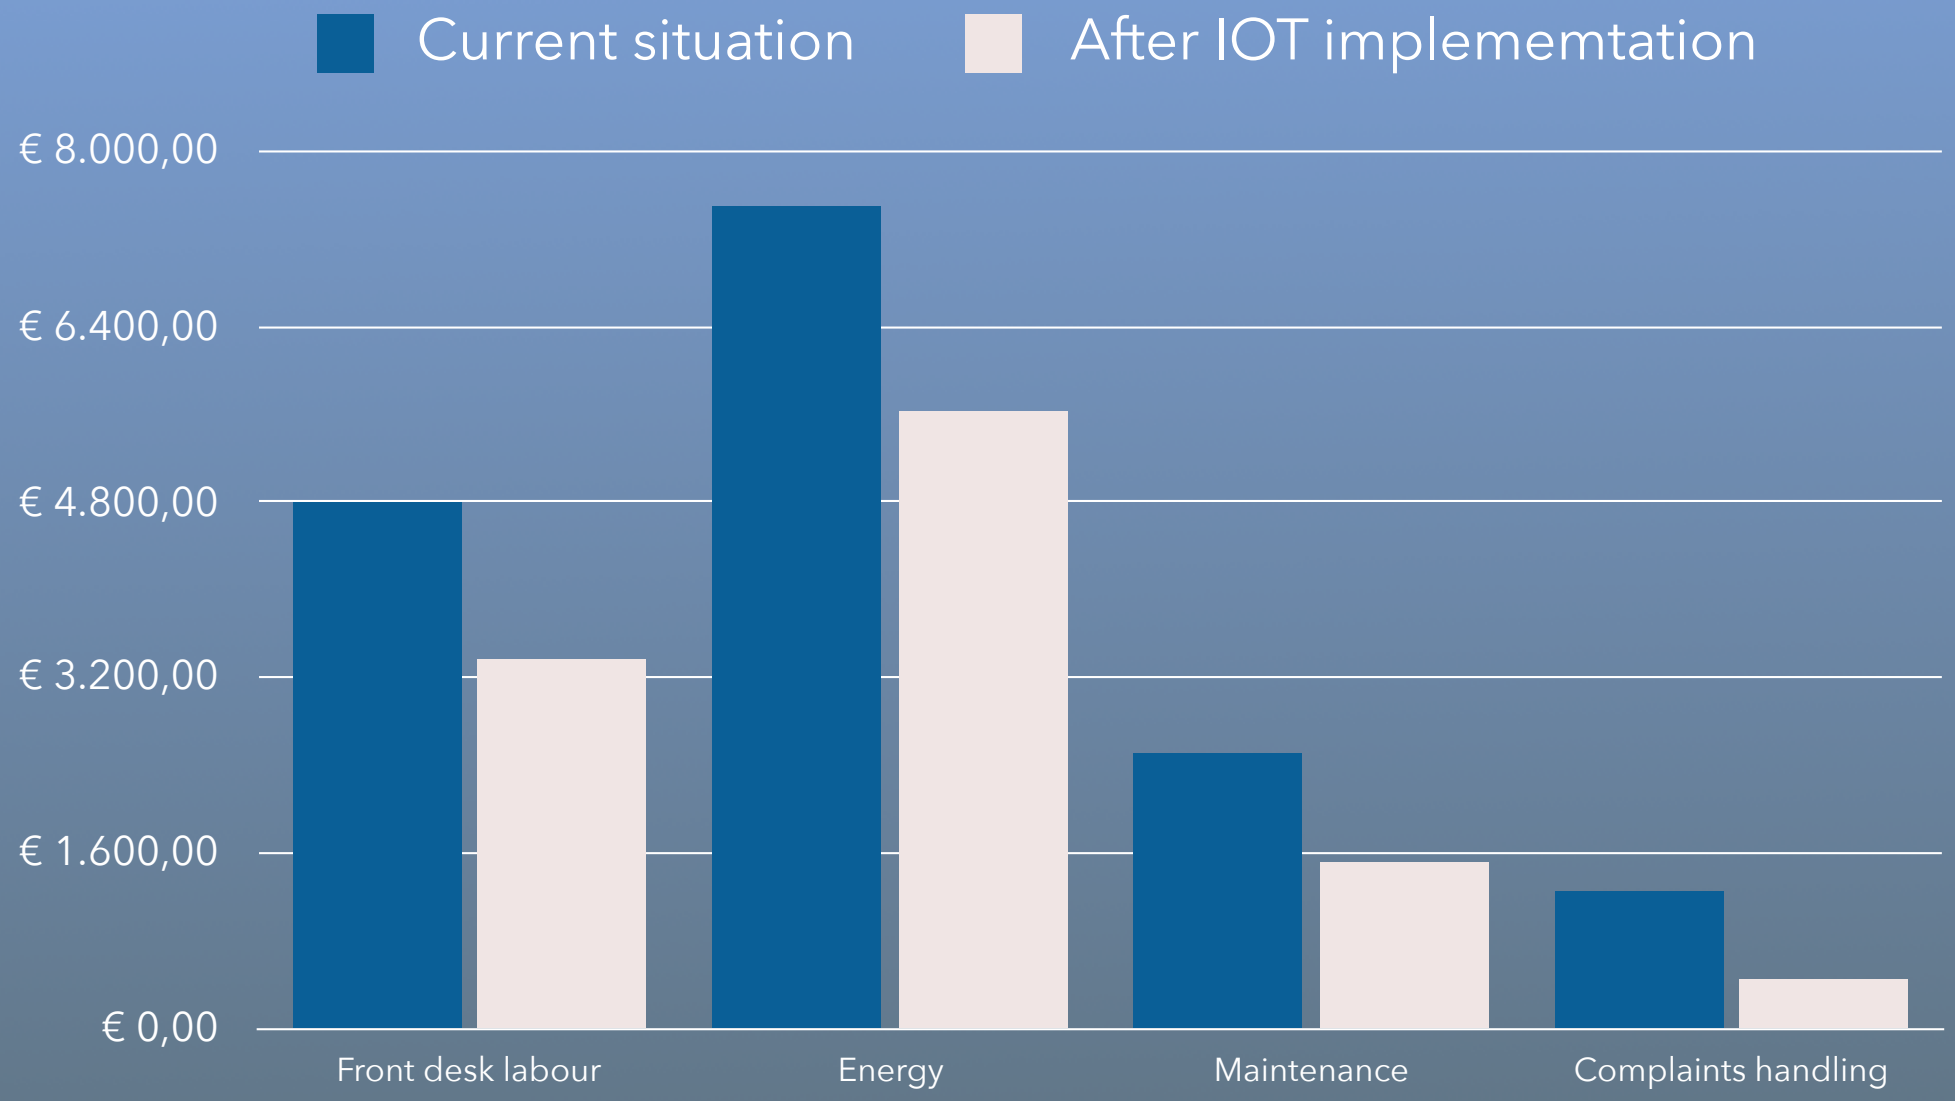
Smart dashboard & data insight



Real-time dashboard for monitoring occupancy, energy use, security cameras and other smart devices.
PMS integration for streamlined operation and housekeeping workflow.
Device health status and predictive maintenance alerts.

Switch to a **positive business impact**

Expect measurable ROIs: in this example estimated savings p.m. at a small hotel with 30 rooms



Why hotels **Choose us?**

End-to-end integration

A full chain of connected technologies bringing all components like hardware, connectivity, data handling, analytics, and user interfaces under one coordinated framework.

For all sizes of properties

Not a one-size-fits-all product. We scale up or down to offer each property a tailor-made IoT solutions, to meet its unique needs. From private rentals to exclusive boutique hotels to large hotels & resorts.

Attractive billing structure

With our monthly subscriptions you start benefiting from automation, energy savings, and guest experience upgrades right away, with a much lower up-front hardware purchases**.** Affordable monthly cost and scaling at your own pace.

Roey Cohen, Founder

" We understand that hotels operate on **tight margins** and that smart locks, in-room sensors and energy management systems often require massive up-front investments. **Let's make your hotel smarter with a supportive billing structure** you can handle. We can start with pilot floors, scale property-by-property, add devices as you renovate, whether you're **upgrading 20 rooms or 2,000**."
